Angular Product List

Output

Filter

The screenshot shows a web browser window with the URL `localhost:4200`. The page has a dark header with the text "Welcome guest!", "Login", and "AdminLogin". Below the header, there is a large orange text "Ready for your summer" with a smiley face emoji. Underneath, there is a "Filter by Type" section with a dropdown menu currently showing "cake". Below the filter, there is a table with the following columns: "Id", "Name", "Picture", "Price", and "Rating". The table contains one row with the following data:

Id	Name	Picture	Price	Rating
1	Chocolate Cake		Out of Stock	★★★★★

Cart

The screenshot shows the same web browser window, but now a cart overlay is visible. The overlay has the title "Your Cart" and a sub-header "Items in Your Cart". It lists the following items:

Item	Quantity	Price
Chocolate Ice Cream	x1	Rs.100
Chocolate Cupcake	x1	Rs.60

Below the items, the total price is displayed as "Total: Rs.160". At the bottom of the overlay, there is a blue button labeled "Buy Now".
